SJUTTONDE BANDETS INNEHÅLL

Sid.

1. Hoffman, R. A., Proton magnetic resonance studies of unsaturated and aromatic compounds with particular regard to effects of electron delocalization 1– 23
2. Rosenberg, A., Studies on carnosinase. III. Metal-ion stabilization of the enzyme 25– 40
3. Rosenberg, A., Studies on carnosinase. IV. The interaction of the activating metal ions with the substrate 41– 50
4. Sköld, O., Inhibition of uracil-utilizing enzymes by 5-fluorouracil and 5-fluorouracil nucleosides 51– 57
5. Sköld, O., Nucleoside and nucleotide derivatives of 5-fluorouracil. Formation with enzymes from Ehrlich ascites tumor 59– 71
6. Gronowitz, S. and Håkansson, R., On the reaction of thiocyanates with organolithium and organomagnesium compounds 73– 82
7. Wahlberg, E., N-acylierte Pyrazolone 83– 88
8. Gronowitz, S. and Karlsson H.-O., New syntheses of 2,2′- and 3,3′-bithienyl 89– 92
9. Gronowitz, S. and Ekman, R., Synthetic estrogenic isoflavonoids. I. The synthesis of 3-(2′-thienyl)-5,7-dihydroxychromone 93– 99
10. Westermark, T., Some measurements on energy loss of 2.8 MeV electrons in light elements and chemical compounds 101–138
11. Westermark, T. and Grapengiesser, B., Observations of light emitted upon dissolution in luminescent liquids of irradiated NaCl, LiF, KI and some organic solids 139–149
12. Westermark, T., Biesèrt, N. and Grapengiesser, B., Observations by means of radiation chemical dosimeter liquid systems of irradiation effects in solid sodium chloride and some organic solids 151–164
13. Gronowitz, S., Moses, P., Hörnfeldt, A.-B. and Håkansson, R., Substituent interactions in thiophenes. I. Preparation of disubstituted thiophenes 165–177
14. Nilsson, A., Gronowitz, S. and Ekman, R., Synthetic estrogenic isoflavonoids. II. The synthesis of $C^{14}_{(4)}$-labelled biochanin A 179–182
15. Lundquist, M., On the formation of racemic compounds in monomolecular films on water. I. 2-Hydroxyalkanes and certain derivatives . 183–195
16. Albertsson, P. Å. and Nyns, Ed. J., Partition of proteins in an aqueous phase system of dextran and polyethylene glycol. Influence of the electrolyte content 197–206
17. von Euler, H., Anti-Ergone und Abwehr-Enzyme 207–211
18. Myrbäck, K., Studies on yeast invertase. XI. Inhibition by organic bases. 1. Aniline 213–226
19. Myrbäck, K. and Willstaedt, E., Studies on yeast invertase. XII. Inhibition by organic bases. 2. Some heterocyclic bases 227–235
20. Gronowitz, S., Moses, P. and Hörnfeldt, A.-B., Proton magnetic resonance of thiophenes. IX. Preparation of substituted thiophenethiols 237–247
21. Pettersson, R. and Vänngård, T., Electron spin resonance of Cu(II) and Ag(II) dithiocarbamates 249–259

Sid.

22. Senning, A. und Lawesson, S.-O., Beiträge zur Chemie α-substituierter Sulfide. III. Über in 3-Stellung aromatisch substituierte 4-Thiaisochroman-1-one 261–264
23. Fredga, A., Weidler, A.-M. and Grönwall, C., Studies on synthetic growth substances. XIII. Optically active 2- and 3-chlorophenoxypropionic acids and their absolute configuration 265–272
24. Zdansky, G., A convenient synthesis of inactive selenocystine 273–279
25. Jansson, G., Induction of water-sensitivity in barley by treatment with water 281–289
26. Melander, L., Acid-induced aromatic hydrogen exchange. V. Discussion of reaction mechanism 291–304
27. Nilsson, A., On the *in vitro* metabolism of the plant estrogen biochanin A in rumen fluid 305–310
28. Vink, H., Diffusion in porous media 311–317
29. Sandberg, R., The kinetics of the hydrolytic fission of the γ-lactone ring of terpenylic acid 319–326
30. Sandberg, R., On the resolution and the racemization of 4-methyl-Δ^3-cyclohexenecarboxylic acid 327–332
31. von Euler, H. und Hasselquist, H., Elektrophoretische Versuche an einem γ-Globulin-Präparat sowie an Seren normaler, sarkomtragender und sarkom-immuner Ratten 333–338
32. Westermark, T. and Lindroth, H., An approach to the study of the chemical reactions of thermal gaseous ions with liquids and some notes on their possible biological effects 339–354
33. Claesson, S. and Wettermark, G., Photochemical depolymerization of cellulose nitrate in solution 355–361
34. Danielsson, H., On the metabolism of 7α-hydroxycholesterol in mouse liver homogenates. Bile acids and steroids 111 363–372
35. Danielsson, H., Formation and metabolism of 26-hydroxycholesterol. Bile acids and steroids 112 373–379
36. Danielsson, H., Synthesis and metabolism of Δ^5-cholestene-3 β, 12 α-diol. Bile acids and steroids 113 381–385
37. Senning, A. und Lawesson, S.-O., Beiträge zur Chemie α-substituierter Sulfide. IV. Über in 3-Stellung aliphatisch substituierte 4-Thiaisochroman-1-one 387–391
38. Lawesson, S.-O. and Frisell, C., Studies on peroxy compounds. XII. Preparation and dealkylation of *t*-butyl aryl ethers 393–400
39. Frisell, C. and Lawesson, S.-O., Studies on elimination. I. The formation of olefins by decomposition of β-ketoesters 401–408
40. Lawesson, S.-O. and Frisell, C., Studies on peroxy compounds. XIII. The introduction of the benzoyloxy group into cyanoacetates 409–419
41. Lawesson, S.-O. and Busch, T., Studies on peroxy compounds. XIV. The reaction of benzaldehyde dialkylacetals with free radicals 421–427
42. Lawesson, S.-O., Andersson, M. and (in part) Berglund, C., Studies on peroxy compounds. XV. The introduction of the *t*-butoxy and benzoyloxy groups into β-ketoesters. A method for the preparation of α-hydroxyesters 429–439
43. Lawesson, S.-O., Jönsson, P.-G. and Taipale, J., Studies on peroxy compounds. XVI. The preparation of benzoyloxy derivatives of β-diketones 441–456

Sid.

44. Lawesson, S.-O., Grönwall, S. and (in part) Andersson, M., Studies on peroxy compounds. XVII. The preparation of acyloins from *t*-butyl acetoacetate 457–463
45. Lawesson, S.-O. and Berglund, C., Studies on peroxy compounds. XVIII. The preparation of aldehydes and ketones from ethers 465–473
46. Lawesson, S.-O. and Berglund, C., Studies on peroxy compounds. XIX. The reaction between *t*-butyl perbenzoate and tetrahydrofuran or tetrahydropyran in the presence of alcohols 475–484
47. Lawesson, S.-O. and Berglund, C., Studies on peroxy compounds. XX. The cuprous chloride catalyzed decomposition of *t*-butyl perbenzoate in alcohols 485–488
48. Senning, A. und Lawesson, S.-O., Beiträge zur Chemie α-substituierter Sulfide. V. Über in 3-Stellung substituierte 4-Thiaisochroman-1-one . . 489–495
49. von Euler, H., Hasselquist, H. und Larsen, A., Gamma-Globuline als Wirkstoff-Komponenten im normalen und im cancerösen Blutplasma . 497–501
50. Bergström, K. and Wallén, P., Removal of contaminating plasminogen from purified bovine fibrinogen 503–511
51. von Euler, H., Hasselquist, H. und Larsen, A., Spaltungen der Nukleinsäuren in saurer Lösung 513–518
52. Zdansky, G., 1,9-Diamino-3,5,7-trithianonane-1,9-dicarboxylic acid and 1,9-diamino-3,7-diselena-5-thianonane-1,9-dicarboxylic acid 519–522
53. Forsén, S. and Nilsson, M., Spectroscopic studies on enols. Part III. Dehydroacetic acid 523–528
54. Olsson, K. and Grönwall, C., On octa-(arylsilsesquioxanes), $(ArSi)_8O_{12}$. I. The phenyl, 4-tolyl, and 1-naphthyl compounds 529–540
55. Gustavson, K. H., Some reactions of succinylated collagen 541–550
56. Hedbom, A., A native cobalamin-polypeptide complex from liver: investigations on the corrinoid part 551–560
57. Gronowitz, S. and Raznikiewicz, T., On the synthesis of the isomeric α-methoxythienylacetic acids 561–568
58. Bergson, G. and Nordström, G., Some experiments with aliphatic selenenylbromides and thiolselenenates 569–577
59. Claesson, S., Palm, G. and Wettermark, G., Sensitized photochemical depolymerization of cellulose nitrate in solution 579–582
